Energy Internship Position

Location: Lake Forest or Oceanside, CA

Status: Part-time, non-exempt, 20-28 hours per week

Job Description:
As an intern at Healthy Buildings, you will assist the Energy Group with the following tasks:

- Utilize EPA’s Portfolio Manager to generate ENERGY STAR Ratings
- Work with clients to obtain information related to building operating parameters and utility consumption
- Submit building performance data for compliance with government benchmarking ordinances
- Coordinate with internal team members to ensure ENERGY STAR Certification requirements are being met

Qualifications:
The right candidate has the following skills:

- Bachelor’s degree (or equivalent) in a related field including Sustainability, Engineering, Architecture, etc.
- Strong organizational and time management skills
- Excellent communication skills (oral and written) and presentation skills

Ideal Candidates:

Our ideal candidate is passionate about energy within the built environment. They are eager to further their knowledge of green building practices and learn how to work with teams to integrate sustainable building strategies that have a net positive impact on the environment through increased energy and water efficiency.
